

Angular Practical Exam - Step by Step Guide

STEP 1 - Install Angular CLI

```
npm install -g @angular/cli
```

STEP 2 - Create Project

```
ng new partc
```

```
cd partc
```

STEP 3 - Run Project

```
ng serve
```

Open:
<http://localhost:4200>

STEP 4 - Open app.ts

Path:
src/app/app.ts

STEP 5 - app.ts Code

```
import { Component } from '@angular/core';  
import { CommonModule } from '@angular/common';
```

```
@Component({  
  selector: 'app-root',  
  imports: [CommonModule],  
  templateUrl: './app.html',  
  styleUrls: ['./app.css']  
})
```

```
export class App {  
  
  page = 'register';  
  
  name = '';  
  email = '';  
  password = '';  
  
  register(n:string, e:string, p:string){  
  
    this.name = n;  
    this.email = e;  
    this.password = p;  
  
    alert("Registration Successful");  
  
    this.page = 'login';  
  }  
  
  login(e:string, p:string){  
  
    if(this.email == e && this.password == p){  
  
      alert("Login Successful");  
  
      this.page = 'profile';  
    }  
  }  
}
```

```

        else{
            alert("Invalid Email or Password");
        }
    }
}

```

STEP 6 - app.html

```

<div class="container">

<div class="box" *ngIf="page=='register'">

<h1>User Registration</h1>

<input type="text" #n placeholder="Enter Name">

<input type="email" #e placeholder="Enter Email">

<input type="password" #p placeholder="Enter Password">

<button (click)="register(n.value,e.value,p.value)">
Register
</button>

<p>
Already have account?
<span (click)="page='login'">Login</span>
</p>

</div>

<div class="box" *ngIf="page=='login'">

<h1>User Login</h1>

<input type="email" #le placeholder="Enter Email">

<input type="password" #lp placeholder="Enter Password">

<button (click)="login(le.value,lp.value)">
Login
</button>

<p>
New User?
<span (click)="page='register'">Register</span>
</p>

</div>

<div class="box" *ngIf="page=='profile'">

<h1>User Profile</h1>

<p>Name : {{name}}</p>

<p>Email : {{email}}</p>

<p>Status : Logged In</p>

</div>

</div>

```

STEP 7 - app.css

```

body{

```

```
margin: 0;
padding: 0;
font-family: Arial;
background-color: #f2f2f2;
}

.container{
width: 100%;
height: 100vh;
display: flex;
justify-content: center;
align-items: center;
}

.box{
width: 300px;
background-color: white;
padding: 20px;
border-radius: 5px;
box-shadow: 0px 0px 5px gray;
}
```

STEP 8 - Run Again

ng serve

Viva Points

1. Register user functionality added.
2. Login user functionality added.
3. Profile page added.
4. Used *ngIf for page navigation.
